

AI & EDUCATION

Leveraging AI for Human-Centered Learning

As artificial intelligence enters classrooms at a rapid pace, many educators are wondering how to adopt AI tools in a manner that is grounded in student-centered care and equity. *Leveraging AI for Human-Centered Learning* by Marlee S. Bunch and Brittany R. Collins emphasizes co-creating learning with students, inviting educators to consider how AI may serve as a supportive tool alongside culturally responsive, social-emotional, and ethical practice. The conversation will help us remember that the most powerful moments in learning emerge from human-centered interactions, such as mentoring, relationship-building, discussion, and collaboration, where students and educators learn with and from one another.

Wednesday, April 1st, 2026 at 1PM-2:30 PM ET

Workshop is free to the general public and will be held virtually on Zoom.

All attendees will receive a 25% discount code for the book.
